

## Digital Signage Services

**Create and manage dynamic digital signage from anywhere on the Internet!**

IVAN's CastNET Hosted Services allow you to utilize your existing video distribution system to present dynamic and informative digital signage. Professionally designed graphic templates make updating and changing content as easy as filling out a form! Best of all, CastNET Hosted Services doesn't require an investment in expensive personnel or equipment.

With CastNET, the messages you display are endless and customizable! Within your branded messages, you have the ability to incorporate up-to-date news and local weather through our NewsJET and MessageBAR subscriber services. This tool is an invaluable resource for any enterprise looking to present company messages, as well as other relevant information in an attractive format!

### IVAN can make you look good!

- Have complete control of everything on your display network
- Update and change content using a Web browser
- Create important messages from home, on the road, or anywhere on the internet
- All content can be pre-approved before it is published
- Dynamic, easy-to-use templates make it easy to create stunning graphics
- No server maintenance or updates required

### IVAN can handle it all for you

With IVAN's Hosted Services, all you need is to log onto a Web server that we host and support. You'll be able to breath easy, knowing that day-to-day operation of your CastNET Web Server is taken care of by a team of our experienced and professional staff. Should questions arise, our help desk personnel are available when you need them.
