

Global IP Video Conferencing

Conduct face-to-face business meetings from anywhere on the Internet!

IVAN's IP videoconferencing technologies break down the distance barriers and make it cost-effective to bring people together. Videoconferencing with IVAN allows you to leverage the power of the Internet to interact with staff and associates as though they were sitting across the table, even when they are across the country.

IVAN provides the secure IP connections and bridging services necessary to allow your company to communicate effectively. Unlike traditional IP, IVAN's dedicated videoconferencing network provides a guaranteed quality of service. Best of all, your company can save thousands of dollars each year as compared to using traditional ISDN lines.

Let IVAN show you the world

- Use cost-effective IP technology for videoconferencing.
- Meet with multiple sites throughout the country at the same time.
- Use your existing videoconferencing equipment on IVAN's dedicated IP network.
- Participating sites can still use ISDN numbers to connect to IVAN's IP network.
- Guaranteed quality of service and secure IP point-to-point network
- Operator assistance is available on all calls during standard business hours.

IVAN knows integration

IVAN's videoconferencing services provide a secure and clear connection so you can focus on what is most important to you: conducting your meeting.

As a consultant and integrator of videoconferencing solutions, Alpha Video's Digital Services Group also designs and installs portable conference systems, large scale conference centers and board rooms. From equipment and room rentals to a fully designed and integrated conference room, Alpha Video's Digital Services Group can provide the total solution for any videoconferencing application.
